Seasons: spring, summer, autumn and winter. Why does gene science matter? Children are curious, and their questions about life around them are unacceptable. An answer often leads to the next question. This is why gene science is such an essential part of their development that they are at the stage where they build the blocks for knowledge, information and discretion. A good early childhood scientific program should help a child form their own opinions, rather than taking that of others as facts. It should help the child develop patience and perseverance. When the child discovers new things, a good science program should also open up new possibilities of research, with great anticipation of new findings. As a guide, help preschool 1. Discover materials, events and objects 2. Ask questions and explore them 3. Attention, describe and record observations 4. Same as Patterns and Relationships 5. Work together (sharing, discussions, and the ability to listen to team members) hope these worksheets are a great start to early-life discoveries. Sheets > Garden > Garden > Weather and science seasons and print these free pdf worksheets to help kids learn about different types of weather and seasons. Example Sunny weather words, rainy, windy, cloudy and snowy types of weather match the picture to the weather Painted the weather Paint the weather: Rainy, Snowy, windy, cloudy weather wheel Create a weather wheel predict the weather predict and draw the weather 4 seasons Studied the 4 seasons: autumn, summer, winter and spring words for seasons adjust season for activities and conditions Seasons and months adjust the seasons in the months of the year Severe weather detects thunderstorms, tsunamis, tornadoes and garden weather sample worksheet and seasons How is the weather? Postcards #9How weather? Postcards #9Seasonal the weather cause children to learn vocabulary and identify the seasons. Learn about spring, summer, autumn and winter with weather postcards.
